Symposium 2012

Dear colleagues and guests,

at the occasion of the International symposium on Inflammatory Heart Disease in Marburg a number of anniversaries and historical moments are worth mentioning:

24 years of cardiac research on heart failure and cardiomyopathies in Marburg
25 years of the Working Group of Myocardial and Pericardial Diseases of the European Society, which I had the pleasure to be its founding chairman in 1987 together with C. Spry,
30 years of the German AG Entzündliche Herzerkrankung, for which H.D. Bolte and I served as founding chairpersons.

We are gratefully looking back to a number international symposia on inflammatory cardiomyopathies, heart failure and pericardial diseases under the patronage of the European Society of Cardiology and the German Cardiac Society:

1986 the 1st International Symposium on Inflammatory Heart Disease in Würzburg
together with Kurt Kochsiek
1990 the 2nd International Symposium on Inflammatory Heart Disease in Marburg
together with Eckhard Olsen
1994 the 3rd International Symposium on Cardiomyopathies in Berlin
together with J.F. Goodwin,
all 3 proceedings published in the European Heart Journal
2000 the 4rd International Symposium on Pericardial Diseases and Cardiac Inflammation
2007 the 5th European Conference on Myocardial and Pericardial disease
with additional Focus on Heart Disease in Women in Marburg
2012 the 6th International Symposium on Inflammatory Heart Disease again in Marburg,
major contributions of the 3 symposia published in HERZ/Cardiovascular Diseases.

Since this is the last international meeting that I will organize as chairman and director of the University Clinic of Internal Medicine and Cardiology of Philipps-University and UKGM GmbH Marburg, I should like to thank all the researchers and clinicians, who have contributed to make these conferences an outstanding scientific event. I am also grateful to those who have given their patronage or their generous financial support over the years as partners from industry, private sponsors, the Verein zur Förderung der Kardiologie, Marburg, the city of Marburg and the German Ministry of Health with its Heart Failure Network. Most of all I am thankful to my teachers, all my collaborators and colleagues in Tübingen, Würzburg and Marburg, who have made basic and clinical research possible and exciting over more than 40 years.
